

Campus safety, in proportion.

Reported offenses relative to enrollment and documented housing occupancy. University of California, Ivy League and selected public and private research universities.

Scope and principal interpretation

The study covers **42 institutions, report years 2022-2024 and 15 category views**. Its primary measure is reported on-campus offenses per 1,000 enrolled students. Eleven institutions have documented fall housing occupancy for an additional, approximate residential normalization. Counts and populations are retained beside rates. [1-3]

Population adjustment addresses institutional size. It does not establish equal reporting, comparable property boundaries or equal exposure. Reported offenses are not convictions, unique victims or the probability that an individual student experiences crime. This report does not assign safety rankings. [7-10]

A housing comparison illustrates the importance of time window

In the institutional ASRs, UC San Diego recorded 20 residential-facility rape offenses for report year 2024; SDSU main campus recorded one. Against documented occupancy, the ratios are 0.91 and 0.12 per 1,000 residents. Across three years, the pooled ratios are 0.73 and 0.70. These are approximate reporting measures, not evidence of equivalent underlying safety. [3-5]

Report period	UCSD: count / occupancy	Per 1,000	SDSU main: count / occupancy	Per 1,000
2022	12 / 17,906	0.67	9 / 7,919	1.14
2023	11 / 18,906	0.58	7 / 8,100	0.86
2024	20 / 21,907	0.91	1 / 8,367	0.12
2022-24 pooled	43 / 58,719	0.73	17 / 24,386	0.70

Named main-campus ASR housing tables, separate from the explorer's all-branch federal aggregation. Property boundaries are not fully matched. Pooled denominators sum annual snapshots, not unique residents. Source cells and calculations are downloadable. [3-5]

Definitions and calculations

Clery counts use calendar **report year**, not necessarily occurrence year. Campus security authorities or local police may receive reports concerning students, staff and visitors. Student housing is a subset of on-campus geography and is never added a second time. [7]

The federal institution numerator aggregates its identified reporting campuses. IPEDS fall headcount enters once per institution-year, including undergraduate/graduate and full-/part-time students. Some reporting campuses are medical, satellite or international facilities. Distance-only students remain in the denominator; excluding them would not produce a verified physically present population. [1,2,8]

Annual rate

$$R_{it} = k \frac{C_{it}}{N_{it}}$$

C_{it} is the selected reported-offense count, N_{it} the corresponding fall population, and k is 1,000 (or 10,000 when selected online). Institution and year are indexed by i and t . Changing scale does not change the comparison.

Pooled annual descriptive ratio

$$R_{i, \text{pooled}} = k \frac{\sum_{t=2022}^{2024} C_{it}}{\sum_{t=2022}^{2024} N_{it}}$$

Sum the three counts and divide by the sum of three annual populations. This equals a denominator-weighted average of annual ratios; an unweighted average generally differs. The denominator is not unique people or measured person-time. Retain full precision until display.

Availability and uncertainty

An unknown count or population invalidates the selected ratio. Source zeros remain zero. For 2024, residential applicability additionally uses federal declarations of which campuses have housing; this is not backfilled into earlier years. No hypothesis tests or confidence bands are offered: they would not resolve reporting, source-revision or property-boundary uncertainty. Offenses are not independent unique victims. [6-8]

2024 on-campus reporting rates (1/2)

Listed criminal offenses, per 1,000 enrolled students. Alphabetical order; institution-wide reporting-campus aggregation. These figures are not a safety ranking. [1,2]

Institution	Reporting campuses	Offenses	Fall enrollment	Rate per 1,000
Brown	1	45	11,956	3.76
Caltech	1	30	2,430	12.35
Carnegie Mellon	6	5	15,888	0.31
Chicago	8	55	18,566	2.96
Columbia	7	129	35,173	3.67
Cornell	3	65	26,793	2.43
Dartmouth	2	110	6,938	15.85
Duke	3	73	17,499	4.17
Florida	37	362	56,311	6.43
Georgetown	6	55	20,031	2.75
Georgia Tech	4	135	53,363	2.53
Harvard	7	216	30,259	7.14
Illinois Urbana-Champaign	2	115	59,238	1.94
Johns Hopkins	10	167	30,210	5.53
Michigan Ann Arbor	1	106	52,855	2.01
MIT	1	21	11,886	1.77
North Carolina Chapel Hill	3	87	32,438	2.68
Northwestern	6	136	23,856	5.70
Notre Dame	7	59	13,042	4.52
NYU	26	51	56,832	0.90
Ohio State Columbus	1	241	61,443	3.92

Combined measure: eleven federal criminal-offense categories. Domestic violence, dating violence and stalking are separate VAWA views online; no overlapping VAWA, hate-crime, arrest or referral counts are added. Counts are not deduplicated incidents. [1,7,8]

Institutions with medical facilities or overseas locations can have substantial population/geography mismatch. Consult the complete reporting-campus list and notes online. SDSU uses IPEDS enrollment (41,137), although its CDS and the State Auditor use 39,373; the complete population reconciliation remains unresolved. [1-3,12]

2024 on-campus reporting rates (2/2)

Listed criminal offenses, per 1,000 enrolled students. Alphabetical order; institution-wide reporting-campus aggregation. These figures are not a safety ranking. [1,2]

Institution	Reporting campuses	Offenses	Fall enrollment	Rate per 1,000
Penn State University Park	3	133	50,737	2.62
Pennsylvania	6	176	29,109	6.05
Princeton	2	62	9,137	6.79
San Diego State	3	46	41,137	1.12
Stanford	12	286	18,625	15.36
Texas Austin	7	73	53,864	1.36
UC Berkeley	2	530	45,882	11.55
UC Davis	2	533	40,065	13.30
UC Irvine	2	287	37,297	7.69
UC Merced	1	48	9,110	5.27
UC Riverside	2	473	26,384	17.93
UC San Diego	1	528	44,256	11.93
UC San Francisco	5	92	3,007	30.60
UC Santa Barbara	1	210	26,133	8.04
UC Santa Cruz	1	95	19,938	4.76
UCLA	1	363	47,335	7.67
USC	9	385	46,566	8.27
Virginia	6	254	26,409	9.62
Washington Seattle	1	238	56,997	4.18
Wisconsin Madison	1	133	51,044	2.61
Yale	2	114	15,564	7.32

Combined measure: eleven federal criminal-offense categories. Domestic violence, dating violence and stalking are separate VAWA views online; no overlapping VAWA, hate-crime, arrest or referral counts are added. Counts are not deduplicated incidents. [1,7,8]

Institutions with medical facilities or overseas locations can have substantial population/geography mismatch. Consult the complete reporting-campus list and notes online. SDSU uses IPEDS enrollment (41,137), although its CDS and the State Auditor use 39,373; the complete population reconciliation remains unresolved. [1-3,12]

Residential normalization and source limits

2024 residential-facility rape offenses per 1,000 documented student residents. Actual occupancy is available for the ten UCs and SDSU; the other 31 institutions remain unavailable. The housing inventory is **not property-matched to Clery geography**. These approximate ratios cannot be read as resident victimization probabilities. [1,3]

Institution	Housing offenses	Fall occupancy	Approx. per 1,000
San Diego State	1	8,367	0.12
UC Berkeley	20	10,862	1.84
UC Davis	9	15,024	0.60
UC Irvine	15	17,695	0.85
UC Merced	6	4,077	1.47
UC Riverside	5	8,465	0.59
UC San Diego	20	21,907	0.91
UC San Francisco	1	832	1.20
UC Santa Barbara	32	10,286	3.11
UC Santa Cruz	38	8,888	4.28
UCLA	10	24,202	0.41

Documented source qualifications

Clustered disclosure. UCSC's 2025 report explains that 21 of its 38 housing rape offenses reported in 2024 were disclosed in one report. Preserve the offense count; do not recast it as 38 unique people or report forms. [6]

Revision differences. UCSD 2022 on-campus rape is 14 in the frozen federal file and 15 in the 2025 ASR; noncampus is 4 versus 5. A direct check of 36 rape cells across UCSD, UCSC and SDSU main found these two differences. Housing cells matched. Federal values remain in the primary explorer. This check covers rape only, not all campus ASRs. [1,4-6]

Historical gaps. All 42 institutions have complete 2024 on-campus counts. Six lack complete all-branch coverage for a 2022-2024 pooled total. Earlier blank housing cells cannot automatically be classified as no housing. Current 2024 declarations resolve that year only; unavailable historical values are retained. [1,8; coverage audit]

Comparable research and audit scope

Administrative statistics and population scale

NCES also normalizes reported campus crime by institutional size, using rates per 10,000 full-time-equivalent students. This study uses enrollment headcount or documented residents. A scale conversion cannot reconcile FTE with headcount, so no unmatched national benchmark is displayed. [9]

Survey prevalence is a different measure

BJS's Campus Climate Survey Validation Study compared survey and Clery measures across nine pilot campuses. Alignment of population, time window, geography and authority reporting materially changes the comparison. Its Clery-comparable survey estimate of 60 rape incidents was not statistically distinguishable from the 40 official Clery rape incidents; the study does not establish universal reporting completeness. [10, printed p. 110]

The AAU 2019 survey covered 33 participating schools and 181,752 respondents, with a 21.9% response rate. Its recall periods, definitions and campus-resource contacts differ from annual Clery statistics. Neither that survey nor the BJS comparison supplies a universal underreporting correction. [11, table 2 and nonresponse appendix]

The accompanying research review also evaluates original institutional-reporting research and official source-quality audits. It distinguishes full-text review from abstract-only evidence and inaccessible leads. This is a targeted review, not a systematic literature review.

Independent checks

The public numerical audit independently reconstructs source-campus aggregates, annual population joins, category sums, missingness, and all 5,670 annual plus 1,890 pooled rates. All rates agreed exactly at the audited precision. The production builder was not imported. A separate ASR comparison reads the original federal workbooks and checks visually reviewed institutional table cells.

A separate citation audit checks claims, source scope, dates, locators and qualifications. Website and PDF visual checks cover mathematical notation, tables and responsive layout. Audit files identify the exact versions reviewed. These checks are not external human peer review or proof of complete source reporting.

Reproduction and remaining limitations

The package contains public aggregate extracts, source references/hashes and calculation code. It recreates rates offline from those extracts; re-extracting the nationwide originals requires the linked downloads. No source-contact lists or individual victim records are included.

Unresolved limits: reporting differences; incomplete historical campus/housing coverage; unmatched housing properties; fall snapshots rather than measured exposure; nonstudents in offense counts; and the SDSU enrollment discrepancy. No correction factor, imputation or safety ranking is inferred from these limitations.
